

CAMERA KITS FOR TRACTORS WITH TOOL

SPLIT-FRONT-TFT

Split-front-view camera system for tractor front tool

- Analog PAL/NTSC only
- Camera-monitor systems for all kinds of tractors with front tools.

Product description

The design of tractors with an attachment at the front causes significant limitations in the field of vision, specifically to the front of the attachment/tool and rear/rear side of the tractor. Orlaco have developed and supply camera kits with split-front-view and rear view-split-front-view.
