### Product description

The Matrix 220 compact barcode imager offers outstanding performance on standard and DPM codes in a compact and lightweight body. Offering higher performance than a MATRIX120 and still in a compact body the MATRIX220 is ideal for more demanding applications.

Superior performance is provided thanks to a new multi core image processing platform and high resolution 1.2MP sensor, embedded fieldbus and PoE capabilities it is an ideal choice for high speed scanning in compact applications.

The Matrix 220 is excellent for DPM and highly reflective surface scanning with its diffuse multi LED polarised version or it can be used with the standard white LEDs for easier to read applications.

As with all of the Matrix series its fully compatible with the easy to use DL.CODE software suite.

Also the MATRIX220 is uniquely designed to be placed on the end of a robot arm due to its size, performance on DPM codes and PoE capabilities.
