MIDWEST OPTICAL - BP590

• For orange LED and fluorescence

 Orange bandpassfilter • Work area 550-620 nm

F/BP590-C

Bandpassfilter - standard, 590nm, for C-Mount

Product description

Midwest Optical Sytems bandpass filters are ideal for use in combination with LED or laser diode lighting. The filter consists of a precision polished glass filter with an anti-reflex coating. They are more rugged, thinner, less angular and have a very high transmission compared to conventional filters. Use of the band-pass filter enhances contrast and often undesirable effects of disturbing light from the surroundings are eliminated.

Specifications

Filter thread (thread diameter x pitch)

C-Mount
