

MIDWEST OPTICAL - BN532

F/BN532-C

Bandpassfilter - narrow, 532nm, for C-Mount

- Green bandpass filter
- Work area 515-560 nm
- For green laser and LED

Product description

Midwest Optical Systems bandpass filters are ideal for use in combination with LED or laser diode lighting. These filters consist of a precision polished glass filter with an anti-reflex coated surface. They are more rugged, thinner, less angular and have a much higher transmission than conventional filters. Use of bandpass filters improves the contrast and often eliminates unwanted effects of disturbing ambient lighting.

Specifications

Filter thread (thread diameter x pitch)
