

MIDWEST OPTICAL - DB940

F/DB940-C

Bandpassfilter - standard, 940nm, for C-Mount

- Narrow IR band
- Work area 385-650 nm and 910-970 nm

Product description

Dual bandpass filters are ideal for color camera applications that need to be in operation 24 hours a day and use IR lighting at night. These filters enhance the camera's ability to capture clear images regardless of lighting conditions.

- Ideal for color camera day / night applications
- Visible light and a narrow IR band
- Block interfering IR wavelength
- Provides clear images in the dark when used with appropriate IR illumination

Specifications

Filter thread (thread diameter x pitch)

C-Mount

● DB940
